WHAT, IN THE WORLD?

'Tis the Season.

Syria

More than 30,000 Popular Mobilization Forces from Iraq Arrive in Syria. They have crossed into Syria to bolster the Syrian army in its ongoing battles in Aleppo.

BREAKING: Assad regime's Republican Guard fleeing Damascus

Syria is becoming similar to when NATO took out Gaddafi and let the opposition take over in Libya. Libya has been fighting in a civil war since those events.

Now Israel has moved in to conquer a major Middle East barrier called Mount Hermon, the highest point in Syrian territory. This is a point of dominance for Israel in the region now; In the past, Israel's radars suffered from a significant blind spot, unable to see beyond Mt. Hermon and parts of Lebanon from their position on Mt. Meron. Iran's low-flying drones exploited this weakness, infiltrating Israel time and time again.

Germany

At least 11 dead and up to 80 injured after terror attack on German Christmas market by man from Saudi Arabia. The video of the event is illegal to circulate in Germany (to protect islamists..).

Jewish Crime Network

Guatemalan authorities raid ultra-Orthodox Jewish sect, taking 160 minors and 40 women into protective custody after reports of abuse and human-trafficking.

Syria Extended:

Playbook goes as usual: Syrian Rebels immediately established their priorities moving forward. Dear neighbors & friends from the friendly state of Israel. There will be no extremism, we share

passion. We invite Israel to come to Syria and invest. Meanwhile, those real “rebels” are already taking fire.

MARTIAL LAW & CIVIL CONFLICT IN SOUTH KOREA

In order to protect liberal democracy from the threat of overthrowing the Republic of Korea's system by anti-state forces operating within the Republic of Korea and to safeguard the safety of the people

Under the terms of Martial Law, the following is specified:

1. All political activities, including activities of the National Assembly, local assemblies, political parties, political associations, rallies, and demonstrations, are prohibited.
2. Any act that denies or attempts to overthrow the liberal democratic system is prohibited, and fake news, manipulation of public opinion, and false propaganda are prohibited.
3. All press and publications are under martial law control.
4. Strikes, work stoppages, and assemblies that incite social unrest are prohibited.
5. All medical personnel, including residents, who are on strike or have left the medical field must return to their regular work within 48 hours and work faithfully. Violators will be

punished in accordance with martial law.

6. Measures will be taken to minimize inconvenience in the daily lives of good citizens, excluding anti-state forces and other forces that seek to overthrow the system.

It's worth noting that a majority of law makers in South Korea voted to end Martial Law but the military failed to stand down saying that they will remain in force until they hear from the President to stand down.

Violators of the above proclamation may be arrested, detained, searched and seized without a warrant pursuant to Article 9 (Special Measures Authority of Martial Law Commander) of the Martial Law Act of the Republic of Korea, and punished pursuant to Article 14 (Penalties) of the Martial Law Act.

Think about this for a moment--> *The South Korean TV channel SBS reported that South Korea has refused to sell weapons to Ukraine. In particular, Ukraine wanted to buy Cheongung anti-aircraft missile systems, as well as radars for the missile defense system and counter-battery radars. The Ukrainian delegation also offered to buy 155-mm ammunition or at least knockout charges for it. South Korea rejected all the proposals.*

AND the following:

Incompetency or Covering it up?

A US Navy F/A-18 Super Hornet was just shot down over the Red Sea...

Navy is saying it was "friendly fire" and our own ship somehow shot them down. Possible this is a cover story and the Houthis shot it down. We used F/A-18s for strikes against them just hours ago.

More Centralization, this time in Asia

Honda, Nissan and Mitsubishi announced they will merge in 2026, a move that would transform the Japanese auto industry.

The merger would create the third largest automobile group in the world, behind Toyota and Volkswagen, allowing the companies to share resources and gain scale against competitors such as Tesla or BYD.

ASSASSINATION IN NEW YORK

The United Healthcare CEO an insurance giant was fatally shot outside the Hilton hotel in midtown Manhattan Wednesday morning. He was attending UnitedHealth Group's annual conference for analysts and investors.

According to video footage it was by a hitman. Knew exactly where he would be within minutes and assassinated him with a silenced pistol. You can see that subsonic rounds (that don't give enough gas pressure to cycle in the next round in chambers) were used. Video footage shows you see the hitman reloading after every shot.

Romanian elections Cancelled

Romanian elections cancelled - because the results were going the wrong way for the deep state. Romania's Constitutional Court annuls the presidential election and orders the process to be completely rerun. The election was won by Călin Georgescu, the candidate who strives for reconciliation with Russia. Georgescu has been explicit in rejecting many US foreign policies and agendas.

Georgescu has taken stances such as anti-feminism, calling out climate change was a business scam, pro-Romanian policies (anti-globalism), anti-vaccine stances and opposition to NATO.

Mexico

The government of Claudia Sheinbaum signed today a decree that increases by 35% the tariff on manufactured goods coming from countries with which there is no free trade agreement.

Zelenskyy's terrorist attack causes War

President Putin says "War has been declared on the Russian world today." A significant shift in rhetoric, sparking concerns globally. It's important to note that since Russia went inside of Ukraine territory, it was deemed a special military operation AND that Ukraine is entirely funded by USA intel, weapons and personnel, already.
